apache-airflow-providers-oracle ¶

apache-airflow-providers-oracle package ¶

[Oracle](#)

Release: 4.6.3

Provider package ¶

This package is for the `oracle` provider. All classes for this package are included in the `airflow.providers.oracle` python package.

Installation ¶

You can install this package on top of an existing Airflow installation via `pip install apache-airflow-providers-oracle`. For the minimum Airflow version supported, see [Requirements](#) below.

Requirements ¶

The minimum Apache Airflow version supported by this provider distribution is `2.11.0`.

apache-airflow-providers-common-compat	>=1.8.0
apache-airflow-providers-common-sql	>=1.32.0
oracledb	>=2.3.0

al cross provider package dependencies

Those are dependencies that might be needed in order to use all the features of the package. You need to install the specified provider distributions in order to use them.

You can install such cross-provider dependencies when installing from PyPI. For example:

```
pip install apache-airflow-providers-oracle[openlineage]
```

Dependent package	Extra
apache-airflow-providers-openlineage	openlineage

Optional dependencies

These extras install optional third-party libraries that enable additional features of the provider. Install them when installing from PyPI. For example:

```
pip install apache-airflow-providers-oracle[numpy]
```

Extra	Dependencies
numpy	numpy>=1.22.4; python_version<'3.11' , numpy>=1.23.2; python_version=='3.11' , numpy>=1.26.0;

	<code>python_version>='3.13' and python_version<'3.14' , numpy>=2.4.3; python_version>='3.14'</code>
openlineage	apache-airflow-providers-openlineage

Downloading official packages ¶

You can download officially released packages and verify their checksums and signatures from the [Official Apache Download site](#)

- [The apache-airflow-providers-oracle 4.6.3 sdist package](#) ([asc](#), [sha512](#))
- [The apache-airflow-providers-oracle 4.6.3 wheel package](#) ([asc](#), [sha512](#))
